

David Whalen is currently working on a doctoral degree in Metaphysics. In addition to private sessions he also offers workshops and retreats on subjects such as the following, 'Light Therapy', 'Attractor Field Dynamics', 'Self-Compassion', 'Affirmations', 'Thought Forms' and 'Healing Colour Rays'.

Working as a professional Property Manager and Certified Engineering Technologist, he has managed many of Canada's largest and most complex government buildings that have had upwards of several thousand occupants. Managing diverse needs from a multi-dimensional environment has offered him some unique experiences in the complex realm of human relations. The professional circumstances through which he has dealt with people have included: ice storms, labor strikes, protests, riots and emergencies such as fires, floods, volatile airborne substances, bomb and anthrax scares and many life and death situations.

During the last six years David has been studying and practicing color light therapy, using the techniques as learned from Dr. Jacob Liberman.

David augments color light therapy with Attractor Field Dynamics. Combined these two modalities support initiates in experiencing their own inner radiance and Light Consciousness. David's visions have taught him how to read and calibrate everyone's subtle "light body". The relationship between those light fields within and one's external world allows people to begin understanding the 'cause and effect' of their thoughts and intentions in their life.

After several hundreds of hours, thru his inner vision, his style of teaching has evolved. David has learned, that the laying of hands is a form of healing and that the hands and arms are an extension of the heart; through them one serves as a transformative conduit. David refers to this practice as "Channeling Light". This technique is freely shared throughout his workshops and light sessions.
