

Biosonic Repatterning

Developed by John Beaulieu, N.D., Ph.D., Biosonic Repatterning is a natural method of healing and consciousness development using tuning forks and other sound modalities based on the sonic ratios inherent in nature. Align your body and mind with the world's best sound healing technologies and information. During a session using the BioSonics tuning forks you'll be able to:

- Achieve deep relaxation and mind/body balance in seconds—not hours Reduce stress and muscular tension, spasms and pain nearly instantaneously
- Increase blood flow and circulation by releasing constriction around targeted organs
- Transcend to higher levels of consciousness and access spiritual insights

Benefits:

- Deep meditation
- Enhanced long trains of thought
- Enlightened dreaming and meditation
- Relaxed awareness
- Creative thinking and problem solving

BioSonic tuning forks are precisely calibrated to lead us into *still point* and retune our nervous system. A still point is a place of maximum energy or energy without form.

Lao Tsu said:

“In silence the teachings are heard;
In stillness the world is transformed.”
